DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 2 and 7-15 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The various references to different forms of the positioning means and the releasing forces are not specifically detailed in the specification to enable the skilled artisan to make the device.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 2, and 4-16 are rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph. Claim 1 – “the parts” in the last line lacks antecedent basis. Claim 2 is vague as to what structure the positioning means is attempting to define. Claim 4 only recites intended use and the minimizing means is vague since it fails to define an actual structural element of the device. Claim 5 recites only an insertion step without the addition of further structure. Claim 7 – “the junctions between the regions” lacks antecedent. Claim 12 - the phrase "in particular" renders the claim indefinite because it is unclear whether the limitation(s) following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Art Unit: 3739

Claim 15 – “the positioning means” and “said position means” lack antecedent basis. Claim 16 fails to set forth any particular method steps.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4, 5, and 9-16 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Avery (3,774,618). Applicant's attention is directed to Figures 3-7. In light of the 35 U.S.C. 112 rejections supra, the reference is properly applied against all the claims. Intended insertion techniques fail to define the actual claimed structure of the device over that disclose by Avery.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 3739

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
